

Differentiated Lessons

Teachers who practice differentiation in the classroom may: Design lessons based on students' learning styles. Group students by shared interest, topic, or ability for assignments. Assess students' learning using formative assessment. Manage the classroom to create a safe and supportive environment. As students with diverse learning styles fill the classroom, many teachers don't always have the time to plan lessons that use differentiated instruction (DI) to suit their distinct aptitudes. This can involve adjusting: Content The media and methods teachers use to impart and instruct skills, ideas and information. Differentiation means tailoring instruction to meet individual needs. Whether teachers differentiate content, process, products, or the learning environment, the use of ongoing assessment and flexible grouping makes this a successful approach to instruction. Most educators agree that differentiated instruction can dramatically help students to succeed, but good differentiation needs careful planning.
